Corporation de la ville de of the Town of HAWKESBURY

CONSTRUCTION NOTICE

CECILE BOULEVARD RECONSTRUCTION BETWEEN GARNEAU AND EDMOND STREETS

September 13, 2018

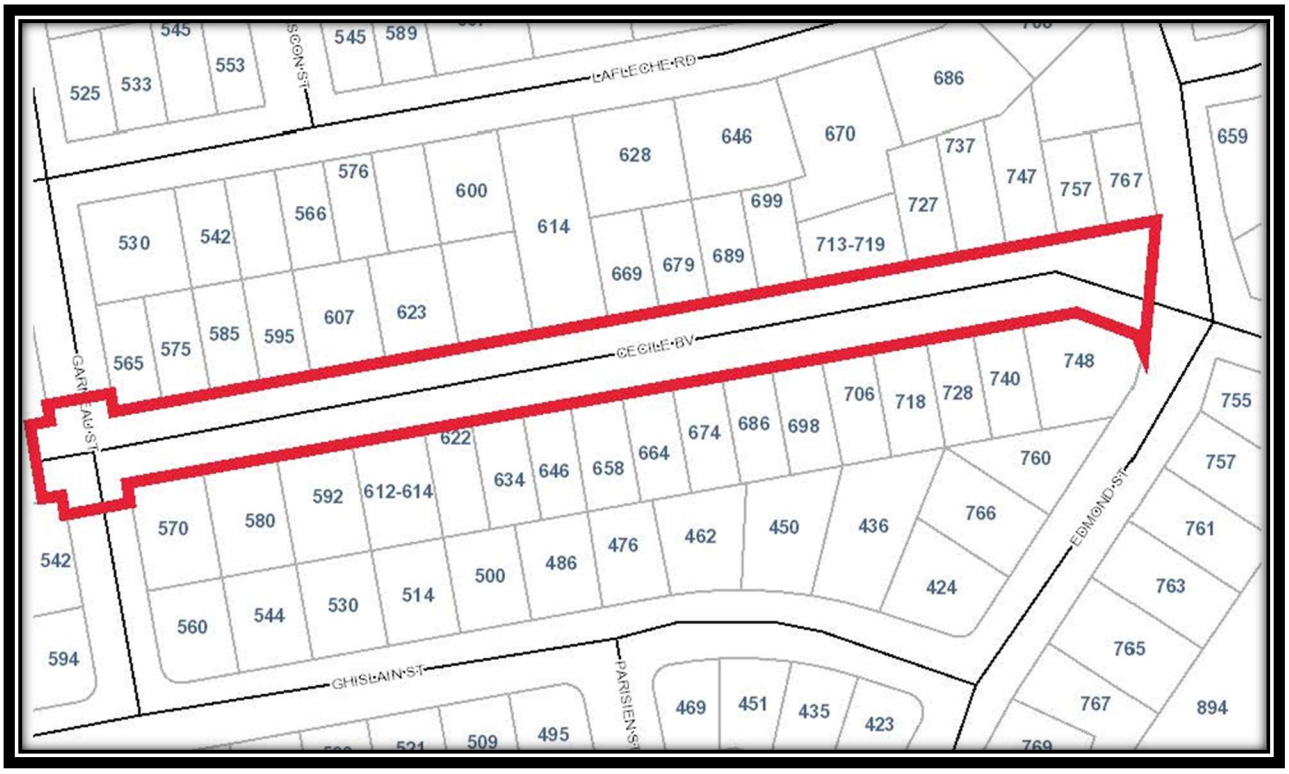
Contract: T04-45-1801
Start Date: September 14, 2018
End Date: November 9, 2018

As part of the continuous improvement to the water, sewer and road networks, the Town of Hawkesbury retained Hawkesbury Transport & Excavation to replace the existing water and sewer lateral services at each of the properties located on blvd. Cecile and by doing so, the street will then be completely rebuilt.

Your understanding and co-operation during the construction period is appreciated.

MAP OF WORK AREA

Cecile Boulevard between Garneau and Edmond Street.



Work Details

Construction is expected to take place from September 2018 to November 2018. The project involves the replacement of the municipal portion of the water and sewer lateral services, and the complete reconstruction of the road including concrete curbs.

Some of the water and sewer lateral services are located in private entrances to residences. For those, it will not be possible to park your vehicle in your entrance while the contractor proceeds to the replacement of the lateral services servicing your property. Arrangements will be made between the contractor and the affected residents concerning access to their homes and for parking cars.

In addition, notices will be distributed to the affected residences when the time comes to pour the new concrete curbs, since once again you will not be able to park in your entrance.

Finally, all disturbed areas will be restored to their pre-construction condition.

What to Expect During Construction

Water Service Disruptions

Only when your water service is replaced will an interruption of water be necessary. It will only last for a few hours and a notice will be distributed 48h beforehand.

Throughout the project, it is recommended to temporarily disconnect any water treatment system (softeners or filters), water conditioners or similar plumbing fixtures.

In the event that you did not receive a notice in advance, an **emergency water shut-off** may have been necessary.

Work Hours

As presented in the Town's noise by-law, working hours should be limited to **7:00 am to 7:00 pm**. However, due to the time of year and the unpredictable weather, Hawkesbury Transport & Excavation has been granted the permission to **start work at 6:30 am**, Monday to Saturday until construction is completed.

Disruptions

As with all construction projects, there will be some temporary inconveniences to the local community. During construction work hours, residents may experience some noise and vibration caused by excavation and construction equipment.

TRAFFIC MANAGEMENT

Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Road users should expect delays and increased traffic on nearby main and side streets.

During the construction period, traffic on Cecile Boulevard will be maintained in both directions. However, traffic will be limited to one lane meaning that temporary signalers or traffic lights will regulate traffic. Delays are to be expected.

In order to complete the work efficiently and in a safe manner, some pedestrian and traffic restrictions will be necessary. However, some works may require a complete closure of the boulevard for a temporary period. At this time, only local traffic (resident of Cecile Blvd.) will be able to access it and a detour will be erected for other motorists.

PEDESTRIAN AND VEHICLE ACCESS

At certain times during the work, vehicle and pedestrian traffic may be disrupted. Signs will be posted to advise of detours, lane closures and pedestrian crossings.

Access to driveways and sidewalks may be restricted at times to allow for construction. Residents will be advised by on-site personnel.

Emergency (police, fire and medical response) access will be maintained at all times.

Recycling and garbage collection will not be affected. Please follow your normal routine.

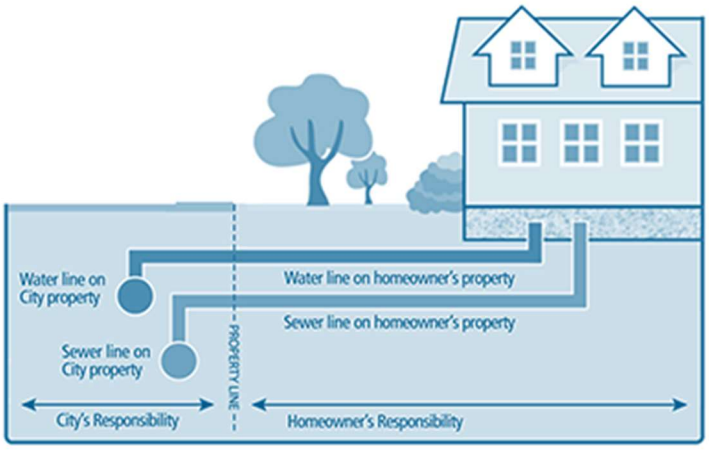
On-street parking will be restricted.

The contractor will further notify you of any temporary disruptions. Every effort will be made to reduce the inconvenience to the local community.

IMPORTANT ADVISORIES

Residents are advised to delay any improvements to driveways until construction is completed.

LATERAL SERVICES



A water, sanitary or storm service lateral is the pipe that connects your house to the Town's water distribution network, sanitary collection system and storm sewer collection system respectively. There are two portions these three services – the privately –owned portion and the publicly-owned portion.

The privately –owned portion runs from the property line to the home/building and is owned by the property owner; the Town-owned portion runs from the property line to the main, be it the water, sanitary or storm and is owned by the Town.

The Town will replace the Town-owned portion of any substandard service connection discovered during construction. **The Town is not responsible for replacing the privately-owned portion of any service.**
